About This Game

Quinn is a citizen of the social media obsessed society of Outpost 72. It is protocol that every citizen has a chip implanted in their brains that connects them continuously to the social network, known as the neural net. However, Quinn has found a way to hack into the neural net causing her to log out. The other citizens are too far gone to log themselves out.

Her brother's consciousness has slipped into the neural net and he has become unresponsive. Quinn wants to use her ability to help him. She has located the source of the net and has a plan to switch everyone off.

As Quinn the player can send the messages and emojis to other individuals of the city to affect their behavior. They can use these methods to solve puzzles, distract guards, and explore the world through the short narrative stealth action adventure game of LOGOUT.

Features:

- Manipulate NPC behavior
 - Short narrative
 - Stealth puzzles
- Original art and soundtrack
- Two levels: subway and city.
